Operations you'll need to carry out on your computer

Operations you'll need to carry out in your vehicle

# 01

## Creating an imprint of your R-Link 2 system

The first thing to do is to make an imprint of your R-Link 2 system on board your vehicle using a USB stick.

The USB stick must be blank with a minimum capacity of 8 gigabytes and in FAT32 format.

Get comfortably settled in your vehicle, start the engine and switch on your R-Link 2.

Put the USB stick in correctly.

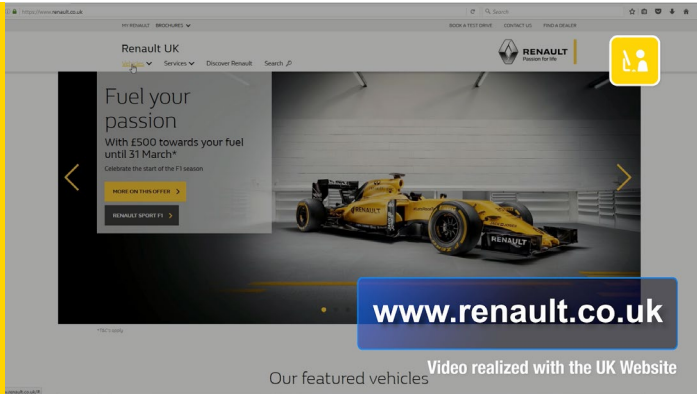

Wait for 1 minute and then take out the USB stick. You have created an imprint of your R-Link 2 system.

## Creating an R-Link Store account

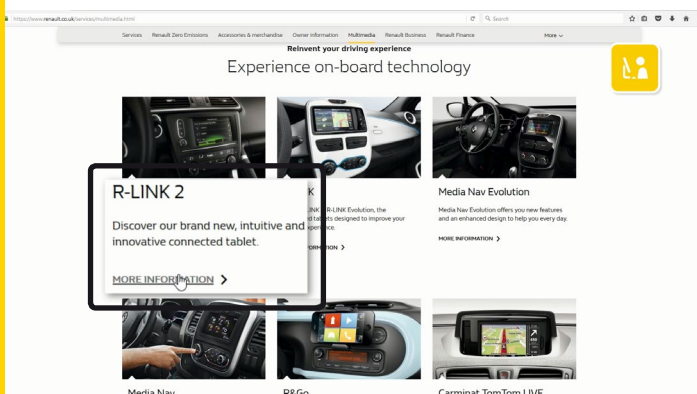

Visit the [www.renault.co.uk](http://www.renault.co.uk) website.

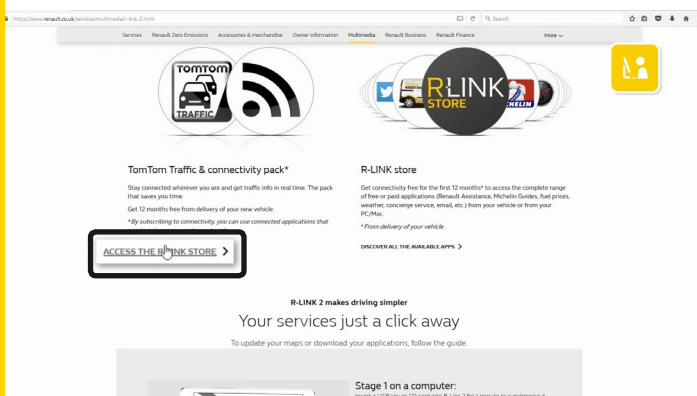

In the "Services" menu, select "Multimedia".

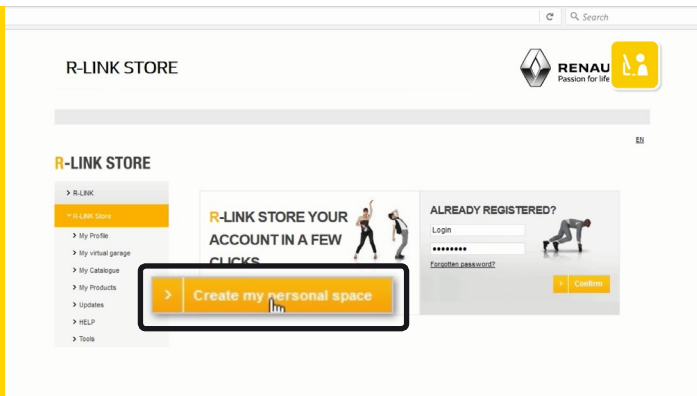

Then select your "R-Link 2" system

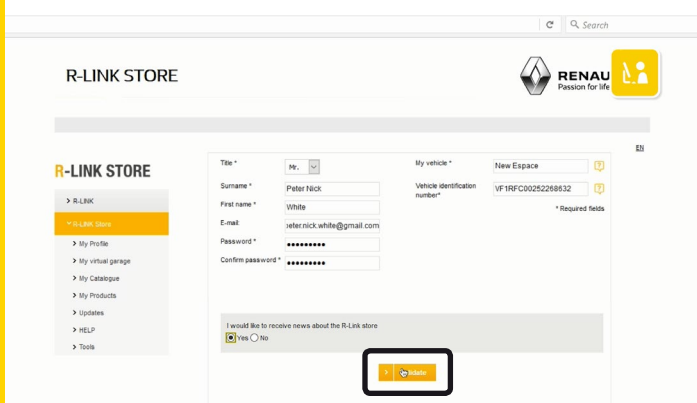

and click "Access the R-Link Store".

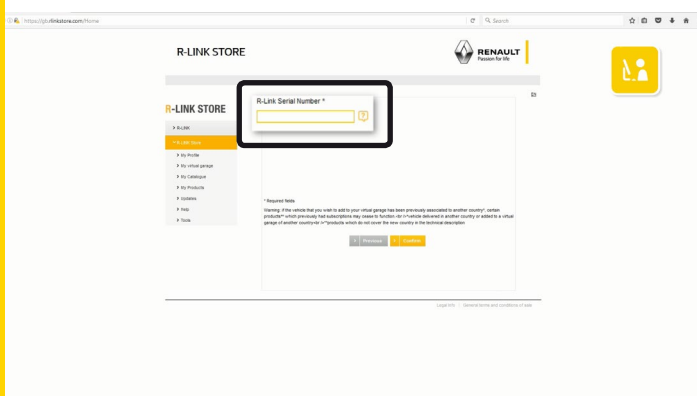

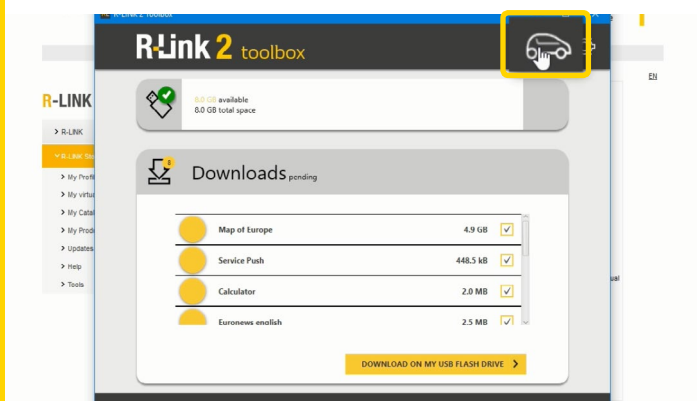

Once on the R-Link Store, since you are not yet a member, click "Create my personal space".

Complete the registration form and then click "Confirm".

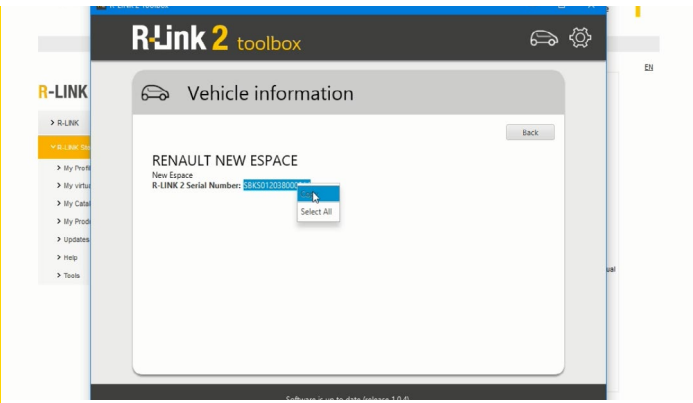

Next, enter the serial number of your R-Link.

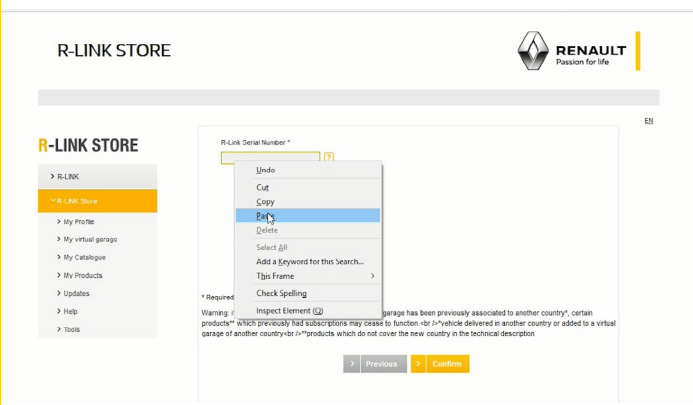

To recover the R-Link serial number insert the USB flash drive on which you created the imprint and then access R-Link 2 Toolbox.

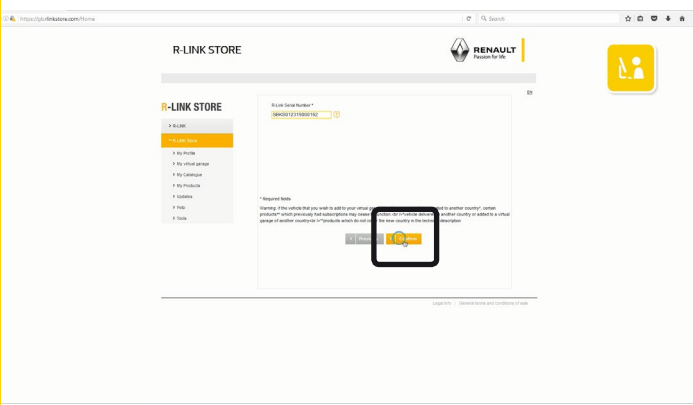

And click the vehicle pictogram.

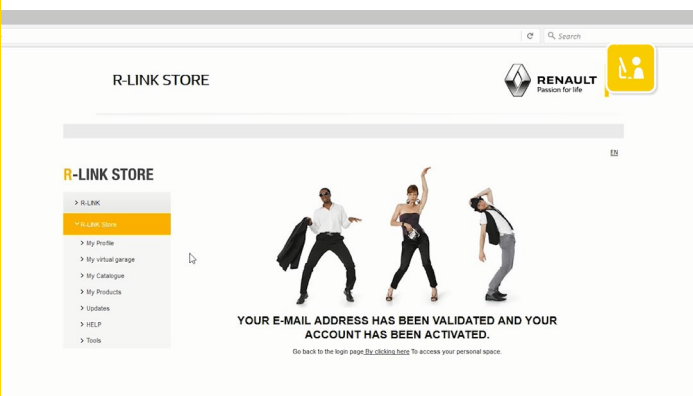

The R-Link Store will automatically recognise your R-Link 2 and enter the serial number.  
Copy the serial number

and paste it into the R-Link Store registration form.

To complete the registration click "Confirm".

You'll receive confirmation by email.  
Click "Activation". You've now created your R-link Store account.

## R-LINK STORE

Welcome White Peter Nick

Congratulations! You are now registered with the Renault R-Link Store. We will help you make the most of R-Link.

First of all, your user name is [peter.nick.white@gmail.com](mailto:peter.nick.white@gmail.com). You can login and manage your account details on [R-Link Store](#).

### R-LINK 2 Toolbox

This tool is essential for creating your personal R-Link Store, downloading products purchased from the R-Link Store onto an SD card or USB stick, downloading free updates and managing products you have already purchased. Download the R-Link 2 software for PC or Mac [PC version](#) / [MAC](#)

### SD CARD / USB Stick

You need to use an SD card or USB stick to install the purchased products or their updates. [See details.](#)

### USEFUL INFORMATION

Before making a purchase, read the relevant product sheet carefully. It contains important information such as:

- The duration of use of the product.
- Countries of use.
- Whether the product can be used whilst driving or only whilst stationary.
- Product size

In the R-Link Store you will find all of the products compatible with R-Link: applications, packs, maps, etc.

All of these products have been specially developed and adapted for use in your vehicle, with one objective: to simplify your life as a motorist.

You'll receive confirmation by email.

Click "R-Link Store".

You've now successfully created your R-Link Store account.
